3 Scenario of Use

Rachel needs to get to her client's location at 66th Street - Lincoln Center in preparation for New York Fashion Week, coming up in about a week and half. She lives in Soho, near the Spring Street stop, which only services the Local A-C-E train.

Tuesday morning, Rachel gets on the 10:12 am Local A-C-E train northbound to 59th Street - Columbus Circle. Rachel just started reading the book "Looking for Alaska" by John Green on her Amazon Kindle, and wants to read the book on her many subway rides.

3 Scenario of Use

Rachel opens up SubwaySiesta, and sets her “Origin” to “Spring Street” on the A-C-E line.

A-C-E does not reach 66th Street - Lincoln Center, so SubwaySiesta notifies Rachel that she needs to input her transfer to start her route timer.

3 Scenario of Use

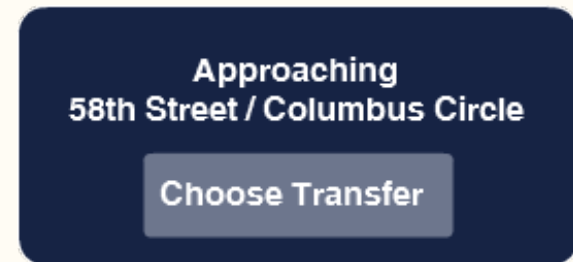

Since Rachel is pretty familiar with the NYC Subway Map already, she knows that she needs to make a transfer at 59th Street - Columbus Circle to get on the Local 1-2-3 train.

SubwaySiesta takes Rachel to a screen where she lists the transfer she needs to make, and SubwaySiesta waits for Rachel to start the timer.

3 Scenario of Use

Rachel starts the timer, and is now able to read “Looking for Alaska”. SubwaySiesta allows Rachel to focus on her book while on her long 14 minute ride on the A-C-E.

As she approaches her first stop at 59th Street - Columbus Circle where she needs to transfer, a pop-up comes up on the iPhone screen to let her know that she needs to start gathering her things to get off this subway.

3 Scenario of Use

Rachel gets off the A-C-E and makes her way to the 1-2-3 Local line. Once she gets on the train, she will start the timer again for this last leg of her trip on SubwaySiesta.

The SubwaySiesta timer will show her that since the trip is only a few minutes long, she doesn't really have time to whip out her Kindle and get some reading in. So she waits the 3 minutes and gets off at 66th Street - Lincoln Center at 10:34 am, ready to begin her long day of design consulting for Fashion Week.
